## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of the invention of Group I (claims 1-17) in the reply filed on June 2, 2006 is acknowledged.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the subject matter of claims 2, 7, 11 and 16 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Hershberger et al. (US 5,470,354).

Hershberger et al. disclose a system including a sensor array 150 that is positively located with respect to trial 80 and separable from trial 80 and a clamping frame or protector 86 with a mating positioning member (170, 172) wherein protector 86 has a mating positioning member 102 (Figs. 3, 5 and 7, col. 7, lines 46-67 and col. 8, lines 1-27 and lines 65-67, col. 9 and col. 10, lines 1-16).

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
